

NEWS UPDATE

October 2012

We have made a new steering console called the MPW130.

The console is targeted at optimizing the use of deck space and ergonomics in the boat.

The console has dimensions of 130cm x 65cm at deck level and with the possibility of being delivered in heights from 115 to 130cm from deck level.

The console has one large single face for installing equipment. This allows maximum flexibility and without restrictions in regard to large screens for plotter or radar.

The wide beam provides a high degree of protection for the crew. Grab handles as shown are standard and optional windscreen can also be fitted.

Inside the console there is space for fuel tanks of up to 400 liter.

Update 15 - October 2012
